Don't do this:

- ❌ ChatGPT or other AI tools are **NOT PERMITTED** to write prompts, evaluate responses, or write justifications.
- ❌ Using AI tools will result in a flag on your account for removal from the project and can lead to removal from the platform.

 Task Overview

Welcome to the ASR Transcript Review Project!

Welcome to the audio transcript review task. In this project, you will be reviewing machine-generated transcripts and correcting them to match exactly what the speaker says. The golden rule here is simple, if you can hear it, transcribe it.

When you open a task, you will see the audio is broken down into manageable segments. You will work through these one at a time. To keep your hands on the keyboard, you can use the built-in shortcuts. Press Control Space to start or pause playback, and type your edits directly into the text box as you listen. If you miss something, pressing Control and the less-than key skips back three seconds, while Control and the greater-than key skips forward. If you are having trouble making out a fast talker, use Control 1 or 2 to slow down the audio, then press Control 3 to bring it back to normal speed.

Keep in mind that you must listen to the entirety of a segment's audio before the progress bar fills and the system allows you to advance. Once you are satisfied with your edits, press Control Enter to save and move to the next section. As you edit, be sure to follow our specific formatting rules.

- Convert spoken numbers and symbols into their written forms, such as using a dollar sign and digits for currency.
- For filler words, use only the exact spellings provided in the guidelines and enclose them in square brackets.
- Non-speech sounds like laughing or coughing should be placed in angle brackets.
- Transcribe everything exactly as spoken without censoring profanity, and punctuate based on the natural flow of the voice rather than strict grammar.
- If an entire clip is in another language or completely muffled by loud static, you will find rejection buttons at the bottom of the screen to skip the task entirely.

After you finish the last segment, you will be taken to a final review screen showing the complete, merged transcript. An automated checker will run and highlight any common formatting issues, which will appear on the right side of your screen. Take a moment to review these flags. Accept the suggestions that look accurate, dismiss the rest, and click the submit button at the bottom to finish your task and move on to the next one. Thank you for your hard work, and happy annotation.

These guidelines are meant to serve as a step-by-step reference while you task. It's a good idea to keep this document open so you can refer back to it whenever needed.

 DO's & DON'Ts

QUICK START!

These **DOs** and **DON'Ts** serve as a quick-start guide to our project's goals, helping you avoid common errors and provide the highest quality possible for your submissions!

Do	→ Do listen to 100% of each segment's audio before advancing. → Do use only the listed tagging and punctuation options. → Do convert spoken expressions to written form. → Do punctuate by how it sounds, not grammar. → Do use <inaudible> if you can't understand a word at all and double ((parentheses)) if you can mostly make it out but aren't sure. → Do transcribe profanity exactly as spoken; no censorship.
Don't	→ Do not create your own tags. → Do not reject if noise is present but speech is understandable. → Do not transcribe lyrics unless the speaker is talking over it. → Do not use colons except for timestamps. → Do not elongate words.

 Project Workflow

Step	Title
Step 1	Segments Review
Step 2	Final Review
Step 3	Task Submission

 Detailed General Guidelines

 Step 1: Segments Review

01	1.1 Review all segments → Each clip is broken into segments. → You'll work through them one at a time, listening and editing simultaneously. → Once you're satisfied with your edits, Ctrl+Enter saves the segment and moves to the next. → If you need to go back, the previous segment button is there — you won't have to re-listen to segments you've already completed. Segment 1 of 10 0:00 – 0:23 of 3:00
02	1.2 Listen to the audio clip → Start playback with Ctrl+Space. → If you need to rehear something, Ctrl+< skips back 3 seconds without leaving the text box. → Ctrl+> skips forward.

- If a section is hard to make out, drop the speed with Ctrl+1 (0.5x) or Ctrl+2 (0.75x), then Ctrl+3 to return to normal when the audio is clear.
- You can chain multiple skip-backs to rewind further, and stop and restart playback at any point.

Important Note:

- ❖ You must listen to 100% of each segment's audio before advancing.

03

1.3 Fix the transcript

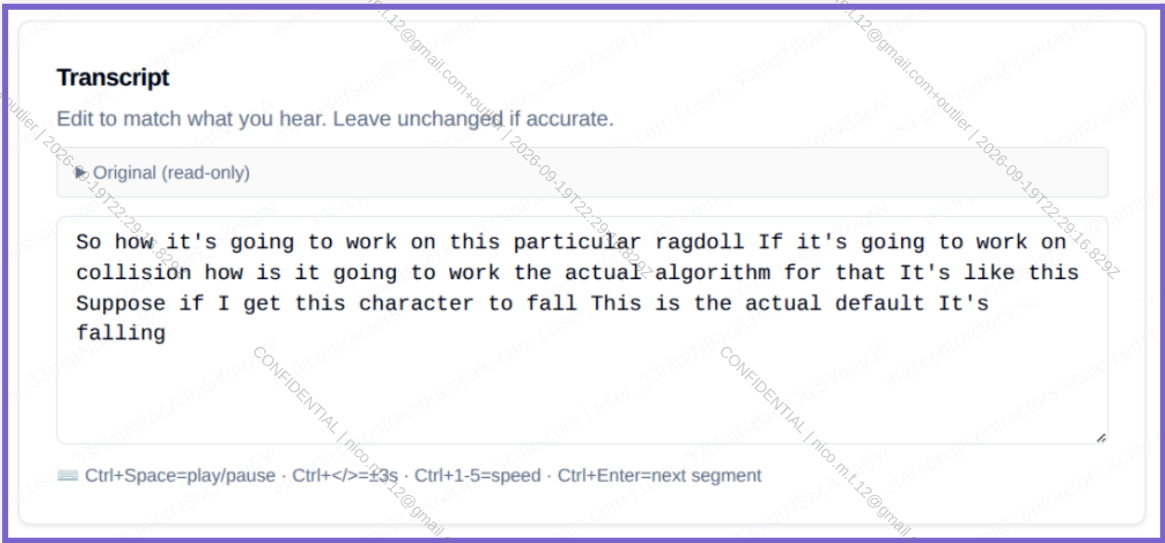

- Edit the text as you go to match what you hear.
- Leave unchanged if accurate.

Good Example

So [uh] I was at the store and I spent \$12.50 on— well, I was going to say groc- groceries, but it was actually just snacks. <laugh> Yeah, \$12.50 on chips.

Important Note:

- ❖ If the transcript is already correct, submit it unchanged — you'll be asked to confirm.

04

1.4 Tagging

- The transcript uses a specific tagging system for non-word events.
- Only use the options below — don't create new ones.

1.4.1 Filler Words [brackets]

- Use ONLY these exact spellings.
- All must have brackets.

[uh] [uhm] [ugh] [hmm] [mm-hmm] [yeah] [yep] [yup] [oh] [aw] [eh]
[ah] [pfft] [shh] [ooh] [huh] [uh-huh] [psst]

	1.4.2 Non-Speech Sounds <angles> → One tag per event. → Always add a space between words and tags. <laugh> <cry> <cough> <gasp> <breath> <throatclear> <swallow> <gag> <noise> <music> <pause> <inaudible>
	1.4.3 False starts → Fragment — add a dash. ↳ e.g. <i>fif- fifteen</i> → Full word repeat — no dash. ↳ e.g. <i>a a a velociraptor</i> → Audio cuts off. ↳ e.g. <i>attending the-</i>
	1.4.4 Inaudible Words → Use <inaudible> if you can't understand a word at all. → If you can mostly make it out but aren't sure, wrap it in double parentheses: ((airplane)).
05	1.5 Written format → Elongated words: spell normally. → Contractions: match audio (don't vs do not). → Standard: OK, 'cause, all right, whoa. → Convert spoken expressions to written form: ↳ "five hundred dollars" → \$500 ↳ "twenty percent" → 20% ↳ "three pm" → 3:00pm ↳ "Jan first" → January 1, 2025 ↳ "A T and T" → AT&T ↳ "D O G" → D O G
06	1.6 Punctuation → Only allowed: . ? ! , " ' - - — punctuated by how it sounds, not grammar. → <pause> for silence longer than 1 second. ↳ Just <pause> alone, never add a duration. → No colons except timestamps.
07	1.7 Other rules → Profanity — transcribe exactly as spoken, no censorship. → Music — tag with <music>, don't transcribe lyrics unless speaker is talking over it. → Informal speech — standard spelling: "chilling" not "chillin".
08	1.8 Buttons → Different Language — Entire clip in a language you don't speak. → Multiple Languages — Clip has languages you don't understand mixed in. → Can't Hear — Entire clip unintelligible. For small sections use <inaudible> instead. → Skip — Move on without submitting. Use sparingly.

🌟 Step 2: Final Review

01

2.1 Make final edits

→ After all segments are done, you'll enter a final review where the full concatenated transcript is shown alongside the complete audio.

→ An automated checker runs and flags common formatting issues — misspelled tags, numbers still in word form, that sort of thing.

→ Accept the suggestions that look right, dismiss the rest, and submit.

Final Review

Listen through the full clip and make any final corrections

gravity it's like telling that if she was in another planet and the gravity is different and that this part right here is going to make the gravity as same as the Earth That's the priority I'm going for So when I'm going on that priority I'm not going to go on the position where she's falling and then she has to get up Means that if she falls means she's dead Means that the health bar is zero That's my priority Sometimes when you play a game a fighting game you hit

⌨ Ctrl+Space=play/pause · Ctrl+↩=±3s · Ctrl+1-5=speed · Ctrl+Enter=submit

🌟 Step 3: Task Submission

01

3.1 Submit the task

Once you've completed all the previous steps and reviewed your response:

→ Submit the task by pressing "Submit Review" or hitting "Enter".

✓ Submit Review

↺ Reset

⏪ Back to Segments

⏭ Skip

02

3.2 When to reject

→ Loud persistent noise/static makes speech unclear.

→ Do not reject if noise is present but speech is understandable (use <noise>).
